

I have chosen Faber Castell Polychromos pencils for this workbook because they are the colored pencils I prefer for my own work. The pigments are excellent and mix well and the cores sharpen well and hold a point. That said, you can use any brand or combination of brands of colored pencils in the same way and with excellent color layering results. This basic list of colored pencils will get you started and allow you to mix most any color you desire. You can add to your collection at any time by purchasing pencils individually.

• *Note: This color collection is geared toward natural subjects, with a focus on colors found in botanicals, portraits, animals or landscape.*

- **Bold** indicates colors on the Split Primary Color Wheel.
- Colors are listed in numerical order for ease of purchasing.

Faber Castell Polychromos
